(54) Title: **RAZOR HAVING TWO SLIDEABLE SHAVING HEADS**

(57) Abstract: Razor (1) comprising: - an elongated hollow handle (2) having a longitudinal axis (X), said handle (2) having a front end (3) and a back end (4) opposite to the front end (3), - a first razor head (6) and a second razor head (7), both mounted onto a support (8) which is mounted in the handle (2) and is sliceable with respect of the same along a direction substantially parallel to the handle axis (X), between at least: - a first use position in which said first razor head (6) projects outward from the front end (3) of the handle (2) to allow shaving, while the second razor head (7) is lodged within the handle (2), and - a second use position in which said second razor head (7) projects outward from the back end (4) of the handle (2) to allow shaving, while the first razor head (6) is lodged within the handle (2), - a manually operable actuator (36) mounted on the support (8) for moving the same from one position to the other.
